

Vaccine distribution timeline*

Mid-December

Healthcare personnel who work in high-risk environments from the hospitals in the state that provide care to the highest numbers of COVID-19 patients.

Late December – January

- Healthcare workers who work in high-risk environments in the remaining hospital facilities
- Remaining healthcare personnel, including: clinics, pharmacy staff, Tribal health, long-term care facilities, assisted living facilities, skilled nursing staff, and other healthcare personnel who are at higher-risk
- School staff
- EMS, first responders, public health workers, and Tribal EMS and Tribal public health workers

February – March

- Long-term care facility staff and residents who have not been vaccinated
- Essential workers (prioritization to be determined)

March – July

- Tribal reservation communities
- Utahns 65 years of age and older
- Employees with a risk level 3 (childcare personnel, personal care, airline workers, etc.)
- Racial and ethnic groups at higher-risk, food prep, and Utahns with underlying medical conditions
- Other Utahns within the risk level model
- Remaining workers in risk level 2 & 3 categories
- All Utahns
