

Medical Moulage - Basic Level

Moulage is the art of injury simulation for the use in training, exercises, and drills, and we want to teach you how to do it! Joined by moulage expert Lanette Sorensen from the Utah Department of Health, we will teach you basic moulage techniques to help your drills and exercises, as well as hands-on experience, lessons learned, and references for your learning and growth. This class is intended for disaster response managers or other community members who hope to use medical moulage to create a more realistic atmosphere for your disaster preparedness trainings.

No pre-requisites or prior trainings are required for this class.

Date: February 23

Time: 9 a.m.

Where: This class will be held in-person at the new ICDP 4646 Lake Park Blvd. in West Valley City

Registration: Register at train.org
