

INTEGRATED CARE COORDINATION TRAINING SERIES

OVERVIEW

A growing body of research shows integrated behavioral health improves health and patient experience, while reducing unnecessary costs in time, money, and delays as well as reduce the stigma associated with seeking these services and maximize resources. Integrated behavioral health offers many benefits:

The purpose of this training series is to offer technical assistance and support as Health Centers further their behavioral health integration efforts. Participants can expect an overview of primary care behavioral health integration, as well as specific practices and workflows that can benefit patients and providers.
