

Influenza Immunization: The Importance of Helping to Protect Your Older Adult Patients from Influenza

PRESENTED BY

Joshua Rosenberg, MD

Critical Care / Infectious Diseases
Chairman, Infection Control
Medical Director Surgical ICU and Attending
Intensivist
The Brooklyn Hospital Center
Brooklyn, NY

"The audience will learn about the broad positive impact of influenza vaccination in older adults. This includes not just the prevention of influenza viral infections, but the prevention of cardiovascular mortality as well."

August 25, 2022, 12:00 p.m.-1:00 p.m. EST
Remote Webinar

Program Objectives

- Review the burden of influenza disease, particularly in older adults and those living with chronic conditions
- Review clinical evidence of influenza vaccines that have been studied in older adults
