

Influenza Immunization: The Importance of Helping to Protect Your Older Adult Patients from Influenza

PRESENTED BY

Stephen Scholand, MD

Infectious Disease
Infectious Diseases Specialist and Associate
Professor,
Department of Medicine
Frank H. Netter School of Medicine,
Quinnipiac University
North Haven, CT

"It's helpful to 'spread the wealth' in your office or practice setting when trying to get folks immunized. A team approach may help identify those who need to be immunized and need to follow up to get the vaccines."

August 30, 2022, 4:00 p.m.-5:00 p.m. EST
Remote Webinar

Program Objectives

- Review the burden of influenza disease, particularly in older adults and those living with chronic conditions
- Review clinical evidence of influenza vaccines that have been studied in older adults

About Stephen Scholand, MD

Dr. Stephen Scholand is doubly board certified in Infectious Diseases and Internal Medicine. He works at Midstate Medical Center, part of the Hartford Healthcare Group, in central Connecticut. He also is heavily involved in Global Health through the Western Connecticut Health Network. He is a seasoned clinician-educator with extensive experience in infectious diseases, immunizations, and hospital medicine. He enjoys teaching medical students and other physicians in training through his various academic appointments. He is a strong advocate of immunization and is passionate about saving lives. He has won numerous awards for teaching and is well published in Infectious Diseases. Despite all his accolades and awards, he describes himself as “a regular guy.”
