

Influenza Immunization: The Importance of Helping to Protect Your Older Adult Patients from Influenza

PRESENTED BY

Yoav Golan, MD, MS, FIDSA

Division of Geographic Medicine and
Infectious Diseases
Tufts Medical Center
Boston, MA

"The audience will better understand the epidemiology of influenza and the indications for specific influenza vaccines. The burden of influenza remains substantial, and much of it can be prevented through better vaccination practices."

September 1, 2022, 12:15 p.m.-1:15 p.m. EST
Remote Webinar

Program Objectives

- Review the burden of influenza disease, particularly in older adults and those living with chronic conditions
- Review clinical evidence of influenza vaccines that have been studied in older adults

Division of Geographic Medicine and Infectious Diseases
Tufts Medical Center
Boston, MA

About Yoav Golan, MD, MS, FIDSA

Dr. Yoav Golan is an attending physician at the Division of Geographic Medicine and Infectious Diseases at Tufts Medical Center, and an Associate Professor of Medicine at Tufts University School of Medicine. Dr. Golan is a graduate of the Hadassah School of Medicine at the Hebrew University in Jerusalem, Israel. He completed a medicine residency and Infectious Diseases fellowship at the Tel Aviv Sourasky Medical Center, followed by a transplant ID fellowship and masters in statistics and modelling at Tufts University School of Medicine. His research focuses on patient risk stratification and the adequate choice of treatment interventions for specific patient profiles.

Dr. Golan's interest in vaccination is in designing processes to ensure adherence with vaccination practices, improving immunization rates, and advising care systems on putting together a successful vaccination program. Dr. Golan serves as the medical director for Delhaize America & Stop-and-Shop vaccination program. This program provides immunizations through hundreds of pharmacies located in supermarkets throughout the East Coast. Dr. Golan designed the program, procedures, standing orders, quality assurance, and monitoring to adverse events.
